Basic Guide To Dental Procedures

2008 Edition — 152 Pages Paperback  
Order Code 978-1-4051-5397-3

The Basic Guide to Dental Procedures provides an indispensable induction to the core preventative and restorative treatments routinely carried out in the modern dental practice. Written as an introductory guide, this text makes no attempt to explain the theory and clinical technique behind each procedure in detail. Rather, with the aid of ‘before and after’ colour illustration it offers sufficient overview to enable the reader to understand and explain procedures to their patient with confidence. Each section is clearly structured to cover the reasoning behind the treatment described, and the basics of how each procedure is carried out.

ADIA

An Introduction To The Australian Dental Industry Association

Formed in 1925, the Australian Dental Industry Association (ADIA) is the national organisation representing the interests of companies that supply dental products and services to dentists and allied oral healthcare professionals.

Over the years the services provided by ADIA to support the dental industry have evolved and the 2010-15 ADIA Strategic Plan outlines a range of initiatives to assist the dental industry understand and influence the commercial, technical and regulatory environment in which the dental industry operates.

Government recognises ADIA as the voice for the dental industry when considering new, or changes to existing, regulations affecting the supply and distribution of dental products and consumables. ADIA provides advice to agencies including the Therapeutic Goods Administration (TGA) and the National eHealth Transition Authority (NeHTA), often nominating industry representatives to government committees and working groups.

ADIA also supports its members in the development of technical standards for dental products and consumables, nominating industry representatives to committees of both Standards Australia and the International Standards Organisation (ISO).

Working with members to ensure that the dental industry has ongoing access to a workforce of skilled professionals, the Association supports the development of both TAFE and university courses relevant to the dental industry and the Association delivers the widely acclaimed ADIA Introduction To Dentistry Course.

To assist its members sell their products and services, ADIA hosts the annual ADX dental exhibition and the ADX Online product database, Australia’s largest fully searchable list of products and services.

Members have the opportunity to contribute to the development of not only the Association, but also the broader dental industry, through a number of national committees that address regulatory, technical, skills and industry promotional issues.
